Overview

In the age of the "Information Super Highway", the Health and Safety Professional is frequently challenged to access, disseminate, archive and use vast quantities of data. The question is, how can this be done in an effective manner? This session will discuss the topic by looking at some currently available resources; services, software and the Internet.

- Lorraine Davison
Canadian Centre for Occupational Health and Safety
- Greg Rawls
Alumax
- Karl Doerwald
Cantron Environmental
- Diane Buhay
Saint John Public Library
- Robert M. Harvey, P.Eng.
Newfoundland Envirotech Ltd.
