**The Atlantic Provinces  
Section of the American  
Industrial Hygiene Association**

**is pleased to offer  
the following course**

## **MICROBIAL REMEDICATION SUPERVISOR**

Learn how to properly and safely provide remediation of mould, mildew and bacteria in indoor environments. This is a practical course that will be of interest to contractor supervisors, consultants and facilities managers/safety officers. Attendees will be able, upon successful completion, to plan, execute and complete all levels of microbial remediation using best available methods.

**This is not simply a modified asbestos abatement course.** Microbes are living organisms that will return if not properly controlled. Asbestos abatement methods are not necessarily suitable for microbial remediation.

### **INSTRUCTOR**

Kim Strong of Maritime Testing (1985) Limited is certified both as CIAQP and CMRS by the American Indoor Air Quality Council and also participates in the AIHA EMPAT program. He has participated in solving microbial problems in hundreds of buildings throughout Canada.

**Cost:** \$495 per person  
**(\$395 for AIHA members)**

**Date:** 26-27 November 2001

**Location:** Best Western Hotel,  
Charlottetown
